

Deliver a next generation banking experience

Exceed customer expectations and comply with evolving security regulations with Wipro Cloud Services for Banking and Microsoft Dynamics 365

Digital disruption is reshaping traditional banking methods

82% of US banking customers access their accounts through digital channels, with smart-phones being the most preferred medium.¹

Firms in the financial services sector are 300 times more vulnerable to cyberattacks than firms in any other sector.²

In the US, the number of digital-only banking customers is expected to grow at a CAGR of 16% from 2021–2025.¹

Traditional banks must adopt modern banking methods or risk losing out to new competition

Rapid digital adoption

Financial institutions face increasing competitive pressure to deliver the digital experiences reshaping the way banks do business, such as online and mobile banking.

Outdated legacy systems

Legacy systems that form core banking platforms of traditional banks are ill-equipped to deliver the kinds of customer experiences provided by newer arrivals in the financial services marketplace.

Increased cyber risk

Increasing digital collaboration across financial institutions present more opportunities for cyber criminals to target a bank's sensitive information and data assets.

Create a modern foundation for secure and collaborative banking

Deliver seamless experiences

With Wipro's comprehensive consulting services, devise a strategy to streamline your operations to meet rapidly evolving customer expectations using Microsoft Dynamics 365.

Simplify legacy systems

Realize the full potential of your core banking applications by leveraging Wipro's product expertise and support capabilities around Dynamics 365.

Ensure secure collaboration

Wipro helps bridge the gap between Dynamics 365 and financial institution compliance to easily facilitate secure collaboration, control data access, manage virtual team creation, and more.
