

Modernize enterprise asset management with Wipro's HxGN EAM expertise

Delivering an innovative approach to ensuring high-performance asset lifecycles, streamlined maintenance processes, and improved risk mitigation.

The HxGN EAM (formerly Infor EAM) solution provides a cloud-driven approach to optimizing asset usage, and as a global alliance partner for Infor and Hexagon, Wipro is helping businesses adopt the solution to enhance enterprise asset management and enable greater productivity. With HxGN EAM's scalable cloud-based capabilities, organizations can solve critical asset-performance challenges, increase asset efficiency for the long term, and drive investment decisions.

Key takeaways

Enable corrective, predictive, pro-active, and preventive maintenance.

Strengthen asset reliability through streamlined maintenance processes.

Seamlessly migrate an on-premises version of HxGN EAM to the cloud.

Reduce downtime with predictive asset performance data.

Stay compliant with industry standards and work toward sustainability goals.

Provide mobile functionalities for field service technicians.

Identify and control all hazardous materials and situations.

Determine accurate inventory levels.

Achieve a 50% reduction in maintenance overtime, purchasing expenses, and labor costs.

Key benefits

Wipro's HxGN EAM experts can partner with organizations to help them gain a range of advantages:

Ensure efficient service-level agreement (SLA) tracking and asset maintenance with work compliance capabilities that automatically flag any noncompliant work orders.

Streamline communication and decision-making by sending automatic emails containing critical reports to the appropriate stakeholders.

Monitor an IT asset's lifecycle from inception to end-of life, whether hardware or software.

Easily manage equipment rentals with remote asset monitoring and gain visibility into business performance through contract profitability tracking.

Features

- IoT-based asset tracking capabilities, allowing predictive maintenance in conjunction with Wipro's Insider Navigation platform
- Import and upload utility tools
- Standard industry-specific mobile apps compatible with Windows/iOS/Android (offering online/offline capabilities)
- Micro-verticalization capabilities enabling a sharp focus on industry requirements and providing integration capabilities with Infor CloudSuite
- Customizable applications for additional development
- Solution documentation and support

By partnering with Wipro on a HxGN EAM adoption, our customers get the additional value with our accelerators such as:

- AI-based predictive maintenance using IoT
- Real-time asset syncing and positioning with augmented reality (AR)
- Ready-made configurations for IT Asset Management
- Work compliance configuration for SLA monitoring
- Automated Email triggering with report attachment

With Wipro's HxGN EAM expertise, enterprises can solve critical asset performance challenges and transform maintenance operations while meeting industry regulations
