

# Intelligent Real Estate Enterprise (IREE)

Accelerate your digital transformation journey with Wipro & SAP

## Problem statement

Currently most companies are tactically focusing on individual technologies relevant to a specific business area and not looking at an enterprise wide picture.

With ever growing complex real estate portfolios, changing tenant and investor expectations and high lead-to-customer conversion ratio demands, commercial real estate companies need to adopt digitalization & agility to keep up with the pace.

## Key features of the offering

IREE delivers an end-to-end offering for commercial real estate companies entailing a combination of underlying SAP solutions (e.g. S/4HANA, C/4HANA, & RE-FX) and Wipro's pre-configured and co-innovated SAP cloud platform extensions to

Improve profitability with deep integration of leasing and finance.

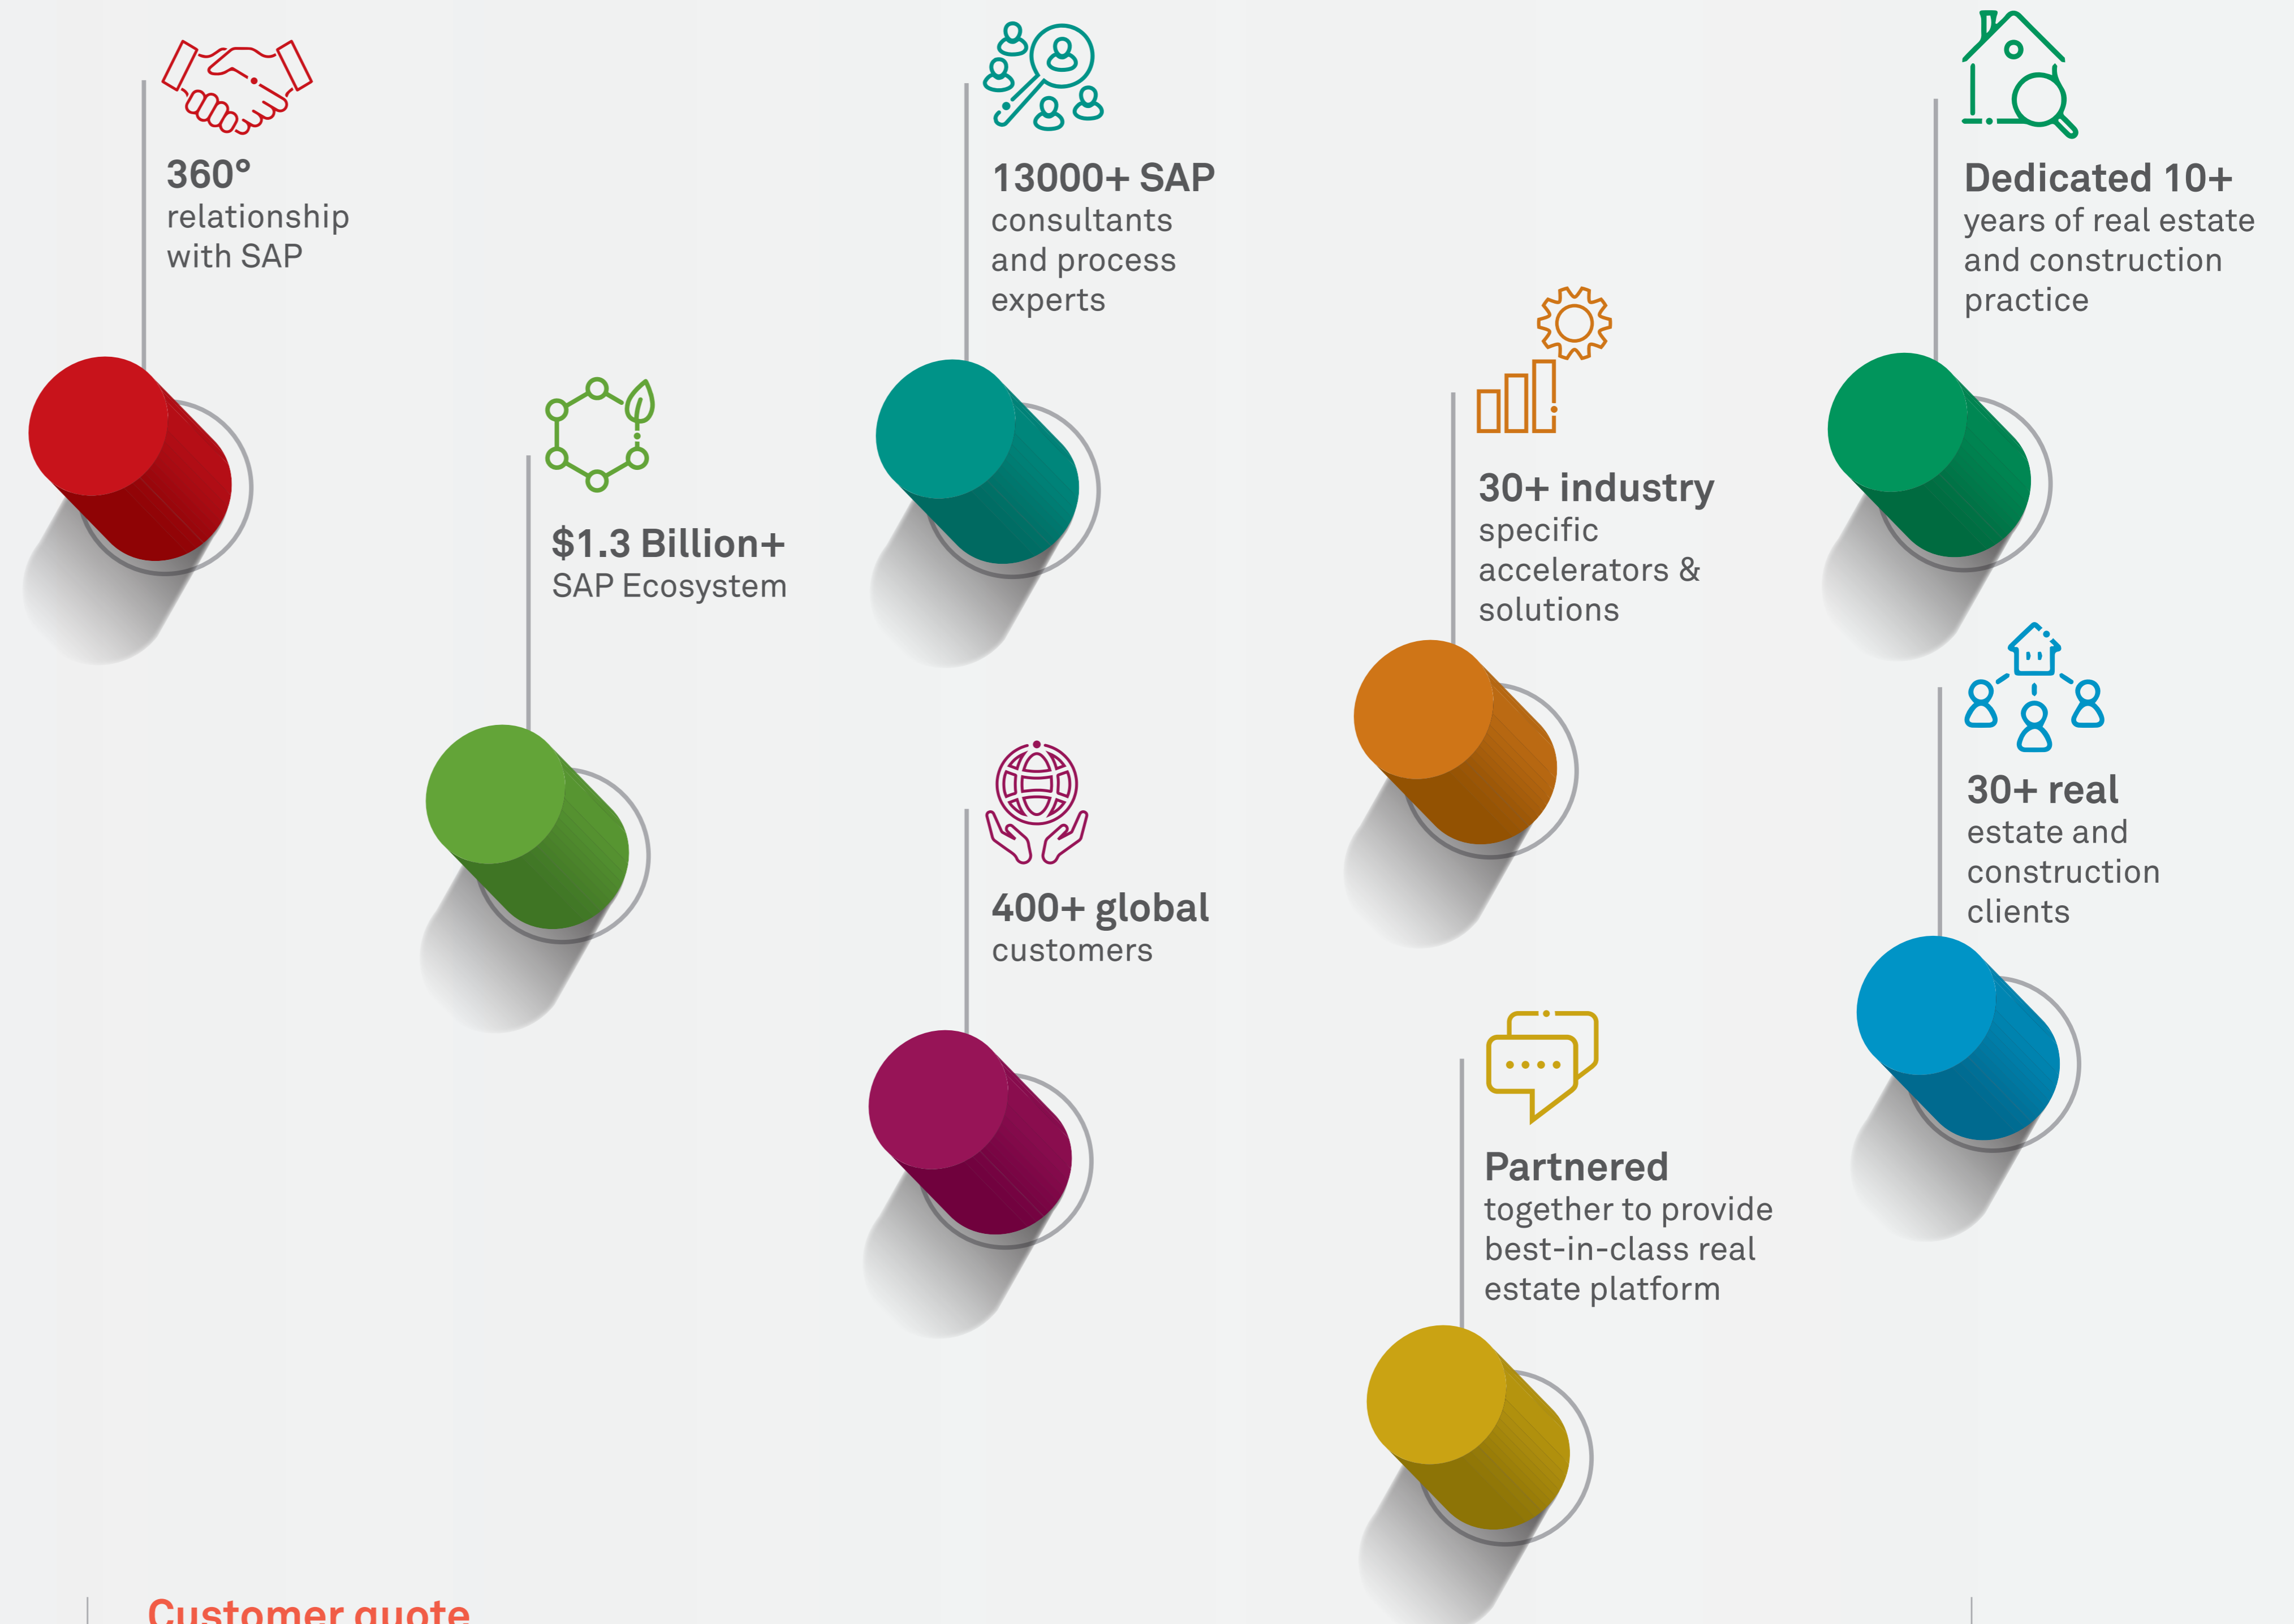

Achieve new levels of productivity with intelligent technologies.

Increase business agility with a modern & flexible platform.

The solution will support multiple deployment options while delivering consistent functionality with a fiori-based user-friendly front-end.

## Why Wipro with SAP ?

### Customer quote

“Our program at the core was the largest implementation of SAP S/4HANA platform which included an integration between existing ecosystem with SAP’s IS-U, CRM and RE-FX modules. Reporting and E-learning capabilities were delivered using SAP’s Business Warehouse (BW) and Enable Now respectively. Wipro did complete implementation enabling end-to-end design, build, testing, data migration, deployment and familiarization phases. We successfully deployed the solution in a single release with data load accuracy of 99.9% for close to 2 million properties.”
