

# Asset management and excellence assessment

Connected assets in the digital world

energy

Companies need to harness the value of their connected assets in the digital world, with disciplined maintenance, reliability programs and integration with operating technologies to enable condition-based maintenance, predictive maintenance and resource optimization.

## The solution

Wipro works with companies to define their journey of transformation. Our approach is holistic and business performance-driven. Outcomes, of the assessment include an analysis of opportunities, a vision of future capabilities, a business case and a roadmap for implementation.

Our approach incorporates key assessment criteria to understand status, gaps and opportunities. We help companies establish a Balanced Scorecard to frame cascading key performance indicators for running and improving the business.

We outline a phased program for transformation, with recommended projects, scope and dependencies.

## Benefits

Improved availability, run rates, quality

Reduced cost (labor, inventory / materials, maintenance, logistics, energy)

Reduced environment and safety risk

Improved employee morale and community perceptions

Reduced downtime

Improved production quality and yield

Improved return on assets

## Features

- Promotes value added activities
