# Migrate to cloud with our Maximo Upgrade Framework

- Maximo Application Suite (MAS) is a cloud enabled, next generation Intelligent Asset management solution designed to monitor, manage, and maintain assets in a single platform and streamline your operations. The suite enhances the user experience with shared data, workflow, Alinfused solutions, and flexible application usage.
- MAS upgrade is an opportunity to migrate your on-prem Maximo to cloud platform of your choice. Cloud is beneficial for reduced risk of data loss, streamlined efficiency and lower cost compared to on prem

#### IBM Maximo Upgrades – Contextualized Offerings

#### Quick Version Upgrade:

Migrate your existing Maximo features, configurations, and customizations to cloud platform of your choice - AWS, Azure, Google, IBM, Wipro Managed, or your private cloud

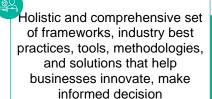

#### **De-customization and Feature Enrichment:**

Enhance your existing configurations and customizations by taking advantage of latest Maximo features along with business process optimization

#### **▶** Business Transformation:

Transform your existing Maximo landscape by implementing business process improvements, industry best practices and latest functionalities

#### **Our Value Proposition**

Proven and time-tested cloud assessment and migration methodology to assure successful upgrade on-time, within budget

Solution adaptation to cloud framework and integrate with existing landscape

Tools and accelerators to improve timeline by 30%. Test accelerator giving benefit of 'Risk Based' testing

Decades of experience with certified consultants

Mitigate program risk and improve business acceptance through iterative approach methodology, business readiness dashboard and checklists

#### **Quick Version Upgrade**

#### **Process**

- Identify custom components through Wipro's migration script
- Upgrade to latest version with upgrade tool
- Cloud readiness assessment
- Migrate custom components
- Eliminate customization wherever possible
- On-prem upgrade or migration to cloud

#### Wipro Tools

#### WIPMigrate

- · Maximo Upgrade tool
- Early detection of errors in upgrade process

#### **Deployment Automation**

- Automated Code migration
- Automated ear build

#### Wipro Archiving solution

 Retain, yet separate out your data

#### MaxT

· Test Automation

#### Wipro Differentiators

#### Early discovery of potential upgrade issues through Wipro's analysis script

- Optimized project plan with reusability and tools usage
- Eliminate risk with automation

## Benefits

Minimal user impact and hence greater acceptance

Testing automation saving ~30%

Project productivity improvement ~15%

#### **De-Customization and Feature Enrichment**

#### **Process**

- Business process simplification & workflow redesign
- Analyze usage of latest functionalities of new version
- Analyze and eliminate customization
- Redesign user interface with start center and work centers usage
- Cloud readiness assessment
- On-prem upgrade or migration to cloud

#### **Wipro Tools**

## Cognitive business process model

- Asset Management leading practices
- Repository of EAM Business processes

#### MaxT

- Test Automation using Easy Auto-mate Selenium
- Maximo Test Accelerator

#### Wipro

with simplified process

#### Benefits

#### Process standardization

Reduced business risk through improved decision making and automated processes

~10%

Better forecasting and planning of maintenance

~20%

#### **Business Transformation**

#### **Process**

- Business process reengineering and adopt to standard industry process
- Re-architect the integrated landscape
- Enhanced "Out of the box" features
- Integrated solution with GIS, Field Mobility and ERP
- Analyze the data mode and adopt a standard data model
- Analyze data quality through profiling rules and improve data quality

#### **Wipro Tools**

### Pre-built Utilities EAM template

- Pre-defined process models with linkage to Maximo
- Role definitions and KPIs mapped to processes
- Ready to use Test cases, data migration templates, list of custom objects

#### Asset Data Quality (ADQ)

- Framework to define business rules
- Data Integrity checks

# Wipro Differentiators

- Benchmarking against industry best practices using Wipro's process
- Reap business benefits quickly with enhancement to operations across the entire value chain
- Next gen user experience for back office as well as field staff

#### Benefits

Leveraging industry leading practices with new Maximo add-ons

operational efficiency

~30%

From our experience helping utilities upgrading their Maximo systems, we recognize that every utility has its specific needs, and one solution doesn't suite all the requirements. Wipro's Maximo upgrade framework meets all such requirements and provides a tailored solution for every business situation, while leveraging the benefits of cloud migration. With the use of tools and accelerators there is a potentially reduced project timeline and effort savings for these solutions
