

Wipro in the United KingdomGender PayGap ReportApril 2025

Inclusivity means a great deal to Wipro. We respect a plurality of ideas, celebrate diversity, and work to ensure each person feels comfortable being their authentic self, free from any conscious or unconscious bias.

As a values-driven organization, and a global leader in our industry, we believe we have a responsibility to lead by example and model these values in every aspect of our business to ensure all Wipro employees feel supported to realize their full potential, both as individuals and as employees.

Across industries, women have been historically underrepresented in leadership roles, contributing to systemic inequalities such as the gender pay gap. Wipro is committed to closing this gap. And while we recognize that addressing such systemic issues can take time, we are confident that our focus on foundational improvements such as leadership training and mentorship programs for women are paving the way for lasting changes in the near and long term.

Another way we are working to address gender inequality is through compliance with UK legislation on gender pay gap reporting, which requires UK businesses with over 250 employees to provide details about the average earnings of men and women in the organization. These figures are important for us to understand what disparities exist throughout our UK branches and how to tailor our efforts to address them most effectively. In accordance with the parameters outlined in the UK legislation, Wipro's mean gender pay gap is 15.2% and its median gender pay gap is 17.4% for our employees in UK.

The median gender pay gap for FY24 reflects Wipro's focus on diverse hiring. Wipro in the recent years employed many more women as compared to men in early- to mid-career streams, a point we are proud of, but which also skews the overall median pay gap across the organization. At the same time, the pay gap in these early to mid-career levels is lower than in overall company figures for UK, reflecting Wipro's commitment to hiring, training, and deploying individuals based on their and experience.

Pay quartiles

However, this approach captures the pay gap of the entire organization as a whole, that essentially means all the Females in the organization are taken as one group and the mean/ median is calculated likewise the process is repeated for Males and then the median This mean/ is compared. give methodology may not the right representation and could be influenced by the gender ratios at different levels and skill sets, more importantly it does not provide an equal substitution between men and women against comparable job.

Therefore, we further analyzed the dataset based on comparable jobs. Comparable jobs in Wipro are based on job evaluation and levels. For each of these levels average pay of females is compared to the average of males. Table-1 below explains the levels of comparable jobs used in Wipro.

Gender pay gap in a comparable job/ role (+ve % denotes average for men is greater than that for women and -ve % denotes average for women is greater than that of men.)

Table - 1

Table-2 below shows the gender ratios split in males and females, and it depicts the positioning of associates based on different headcount ratios as per the approach outlined in UK legislation. The gap would be visible since the median for females will be lower than that of males, because of the headcount split.

Female: 66% till level 4

Male: 54% till level 4

Table - 2

Level	Female HC as a % of total females	Male HC as a % of total males
1	3.83%	1.45%
2	13.03%	6.6 <mark>9%</mark>
3	20.31%	17.34%
4	29.12%	28.55%
5	21.46%	22.90%
6	9.96%	18.63%
7	2.30%	4.44 <mark>%</mark>

Job Level	Wipro Level	Gender pay gap	
1	Individual contributor with even no experience, a beginner in respective domain. Performs a range of mainly straightforward assignments.	2.52%	
2	Individual contributor with intermediate expertise in respective domain with min 2 years of experience. Performs a variety of routine tasks or assignments.	-3.74%	
3	Individual contributor with advanced expertise in respective domain. May lead projects or project steps within a broader project or have accountability for ongoing activities or objectives.	-0.01%	
4	First level management role specializing in Technology with expertise in respective domain. Has accountability for the performance and results of a team within own discipline or function.	6.79%	
5	Seasoned Management level role with advance Technology specialist in respective domain. Has accountability for the performance and results of multiple related units.	-4.01%	
6	1st Level Manager of managers handling a large portfolio by providing direction to L1 and L2 managers. Has accountability for the performance and results of a large, strategically important discipline in a single/ multiple market/ units.	4.17%	
7	2 nd Level Manager of managers handling multiple portfolios by providing direction to 1 st Level of managers as well as to L1 and L2 managers.	-6.96%	

Headcount distribution key pointers from table-2:

• Almost 2/3rd (66%) of total Female population falls into level 4 and below group.

• Almost 1/3rd of total Female population falls into level 5 and above group.

• Whereas for Males, only 54% of the total Male population falls into level 4 and below while 46% falls into level 5 and above group.

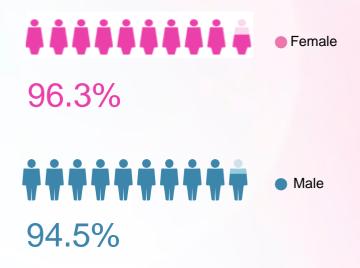

• Insight: As a result of the above distribution, the median value for Females currently lies in level 4, same as males but on a lower side due to headcount split.

Wipro strives to maintain fair compensation for any role throughout the organization, irrespective of the gender, and our compensation ranges for men and women in each role are aligned. We ensure periodic salary revisions, increases and promotions based on merit to maintain competitive pay for both men and women.

We are committed to making Wipro a place where women can safely grow, develop, and thrive. We are focused on improving retention, growth, and engagement to increase representation of women at all levels in the organization and continue to encourage and support women interested in more high-impact leadership roles. We recognize that there is still a lot to be done to create a more equitable workplace for all and we are committed to taking the necessary steps. For instance, Wipro's mean bonus pay gap in UK is 45.00% and its median bonus pay gap is 31.98%. These bonuses include variable pay, incentives and commission.

Percentage of employees

who received bonus payouts in the 12 months to April 5, 2024.

To close these pay gaps, we need to increase the representation of women in senior management roles, and we have set a goal of increasing representation of women at senior leadership levels.

The multiple programs we run under the aegis of "Women of Wipro" aim to promote gender equality by mentoring high-potential women employees and preparing them for leadership roles. These initiatives utilize a life-stage approach to support women at

various stages of their lives and career development. Our flagship capability programs, such as Your Career Your Choice (YCYC) and Women in Leadership (WIL), help competitive and women stay tackle workplace challenges. Other initiatives include Enrich, our sponsorship program for high-potential women leaders, and Begin Again, which is focused on hiring women who have taken a break from their careers.

Our commitment to making inclusion a way of life at Wipro is reinforced by our leadership. Together we are putting in the work to make lasting changes that will benefit our colleagues, our customers, and our communities.

Ambitions Realized.
