Wipro Forms New Partnership to Strengthen Its Enterprise AI-Ready Platform

Wipro's Enterprise AI-Ready platform, powered by the Dell AI Factory with NVIDIA, will leverage Dell Validated Designs

The collaboration will provide enterprises with access to best-in-class technology and the latest in chip designs

EAST BRUNSWICK, N.J. | BENGALURU, India – Aug 27, 2024: Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading technology services and consulting company, today announced that it is expanding its collaboration with Dell Technologies to bring the Dell AI Factory to [Wipro's Enterprise AI-Ready Platform](#). The collaboration will allow enhanced cost control and risk mitigation while providing enterprises with access to the best-in-class technology, accelerating the adoption of AI across cloud, data center and edge environments.

Wipro's Enterprise AI-Ready Platform will leverage the [Dell AI Factory with NVIDIA](#), including Dell Validated Designs for Generative AI, bringing GenAI processing power to data without extensive upfront investment. The platform is supported by the [NVIDIA AI Enterprise](#) software platform, underpinned by [NVIDIA H100 Tensor Core GPUs](#), and the [NVIDIA Spectrum-X™ Ethernet networking platform](#).

The [Wipro AI Control Center](#), an advanced orchestration layer that resides on the Wipro Enterprise AI-Ready platform and enables a seamless infusion of AI for IT and business, will now provide enhanced throughput from the Dell infrastructure. The Intelligent Control Center will ensure seamless integration of use case blueprints across the entire AI life cycle, from pilot to production and support the safe, responsible, and sustainable adoption of AI by offering robust governance, observability, and automation capabilities.

“Enterprises are keen to utilize their own data and business context to train, fine-tune, and deploy AI on Dell solutions. This approach effectively and efficiently integrates advanced AI into their core business processes, bringing AI to the data rather than moving data to AI,” said **Jo Debecker, Managing Partner & Global Head, Wipro FullStride Cloud**. “The solutions we have created as part of this collaboration will help enterprises achieve new levels of flexibility when building their enterprise-specific AI ecosystems. Our goal is to make AI consumption as efficient, agile, reliable, and sustainable as possible - ultimately helping advance the adoption of enterprise-level AI.”

“As the market demand for AI enabled solutions continues to climb, Dell is innovating at every level of the AI technology stack to deliver future-proof data centers,” said **Denise Millard, Chief Partner Officer, Dell Technologies**. “By leveraging the Dell AI Factory in Wipro's Enterprise AI-Ready Platform, we're providing customers with a comprehensive collection of products, solutions and services to accelerate their AI initiatives.”

The Dell AI Factory with NVIDIA brings together AI-optimized technologies, validated and integrated solutions, expert services and best practices to help customers achieve AI outcomes faster. Access to the industry's broadest AI portfolio provides customers with targeted and repeatable success for deploying AI by considering both technical and business requirements.

The Dell solution is available for clients to experience at Wipro's FullStride Cloud Studio in Bengaluru.

Forward-Looking Statements

The forward-looking statements contained herein represent Wipro's beliefs regarding future events, many of which are by their nature, inherently uncertain and outside Wipro's control. Such statements include, but are not limited to, statements regarding Wipro's growth prospects, its future financial operating results, and its plans, expectations and intentions. Wipro cautions readers that the forward-looking statements contained herein are subject to risks and uncertainties that could cause actual results to differ materially from the results anticipated by such statements. Such risks and uncertainties include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, complete proposed corporate actions, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our business and industry.

Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission, including, but not limited to, Annual Reports on Form 20-F. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
