Wipro Digital Modernization Platform (DMP)

Wipro Digital Modernization Platform (DMP) provides a one stop solution for application refactoring, migration and accelerated green field/brown field development. DMP transforms the application to a loosely coupled architecture conforming to API, microservices principles and design patterns.

Faster, cost-effective and reliable application migration and modernization

Automated application profiling, assessment and code remediation

Ensuring digital and Cloud native environment

Cost-effective and speedy application migration

Accelerated green field/brown field application development with 35-40% automated code generation

# Enabling legacy applications to be digital and Cloud native

Figure 1: Solution overview

Key benefits

- Lowers migration cost and risk
- Ensures faster time-to-market
- Ensures no vendor locking
- Enables application to be digital ready and Cloud native

Solution features

- Accelerated application migration with automated code profiling and remediation
- Automated green field application development
- Easy integration with open source environment
- Enables containerization (Docker/Kubernetes) based on low-code/no-code

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. A company recognized globally for its comprehensive portfolio of services, strong commitment to sustainability and good corporate citizenship, we have over 160,000 dedicated employees serving clients across six continents. Together, we discover ideas and connect the dots to build a better and a bold new future.
