

Wipro's Middleware Migration solution

Wipro's Middleware Migration solution helps clients migrate or upgrade from one middleware platform to another. The solution is part of Wipro's Digital Integration as-a-Service platform and uses automation in migration by following a canonical model based migration approach with a componentized and framework governed tool.

Deep experience across middleware technologies and industry domains

Automated tools for middleware assessment and migration automation

Repeatable and systematic migration methodology that ensures predictability and success of migration projects

Templates, tools and migration checklists to help during migration assessment and implementation

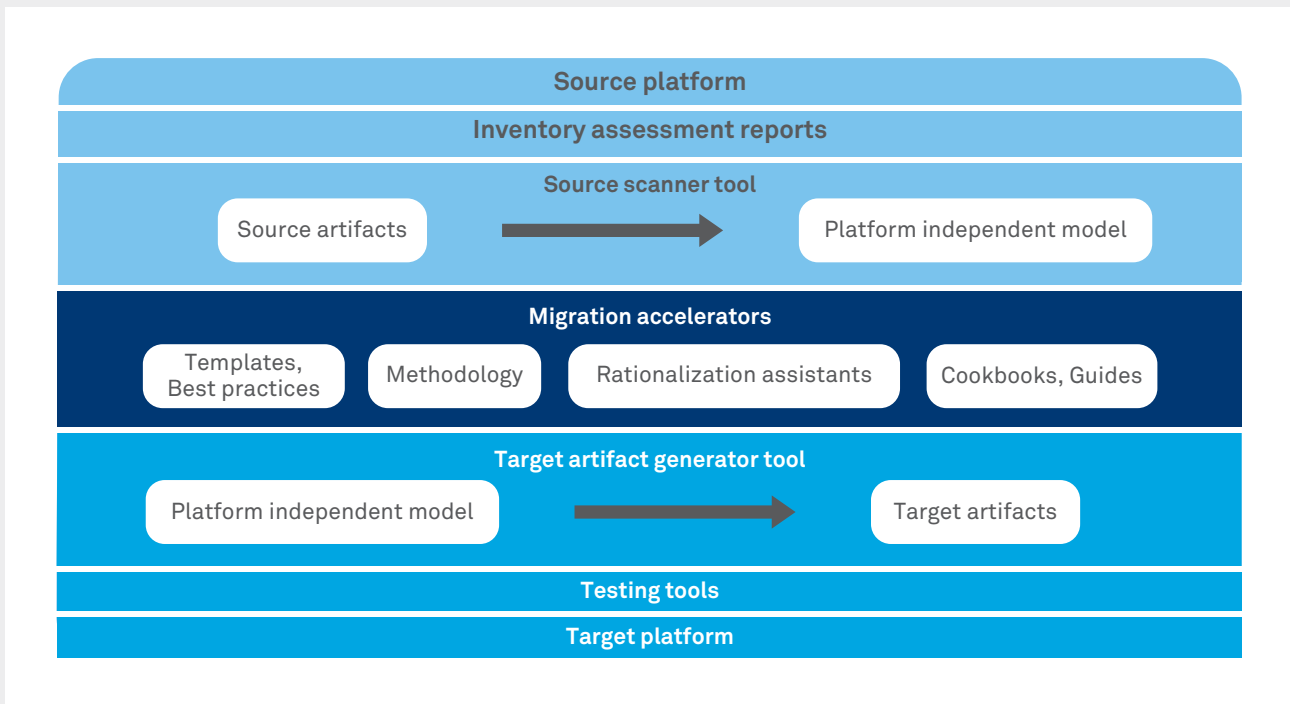

Quicker resolution of issues by leveraging best practices, guidelines and experiences from past engagements

Solution overview

Wipro's Middleware Migration solution comprises a platform independent source scanner to scan and profile existing code base, migration accelerators to convert the source artifacts into intermediate canonical model, and a target artifact generator tool to convert intermediate canonical model to target platform.

An expedient way to migrate from legacy to next-gen technologies, including cross product migration and product version upgrades

Key features

- Templates for analysis of integration architecture and requirement specifications
- Tool based approach to data mapping, technical design and service catalogue creation, deployment and knowledge transfer of operations
- Common framework for reusable flows and components including exception handling framework and batch processing
- Automated tool to facilitate artifact migration

Key benefits

- Automated migration towards future ready middleware platform
 - 30% effort saving in migration
 - 30% reduction in cycle time
- Predictability and consistency in migration
- Reduced risks and errors in migration
