Azure Cloud Security for SAP HANA Workloads

How does Wipro's SAP on Azure Security and Compliance Service help to fast track and strengthen SAP on Azure adoption for enterprises?

Wipro's comprehensive security and compliance solution framework for Azure cloud ensures layered protection for SAP workloads. Wipro brings depth of hybrid cloud security and compliance expertise to secure SAP application as well as the service workloads such as servers and DBs on Azure by leveraging native security controls, Wipro's frameworks, and 3rd party security solutions. Our partner solution SECUDE HALOCORE provides contextual driven data protection to the SAP data exported out of the system by integration with Microsoft Information Protection services. This integration ensures the same level of SAP access control on data is continued even outside of the SAP system. Wipro's Azure landing zone security framework helps to rapidly setup all the adequate security and compliance controls to onboard SAP workloads, and provide continuous security and compliance monitoring.

- Achieve greater compliance through Wipro's framework and partner solution HALOCORE.
- Protection and control over sensitive SAP data to comply with regulatory mandates.
- Strengthening overall security and compliance posture of SAP environment through comprehensive security and compliance solution.
