

A black and white photograph of three people (two women and one man) sitting around a table in a meeting. They are looking at a laptop and smiling. There are coffee cups on the table. The image is partially overlaid by a large red circle on the left side.

Wipro's Digital Integration as-a-Service

Wipro's Digital Integration as-a-Service is a smart, hybrid and elastic platform for integration of everything, from businesses and applications to Cloud and Things. The platform is built on a Cloud-first, API-first and microservices based architecture to ensure digital readiness and can be operated in as-a-Service or hybrid models. It comes with self service capability to enable iSaaS (citizen integration).

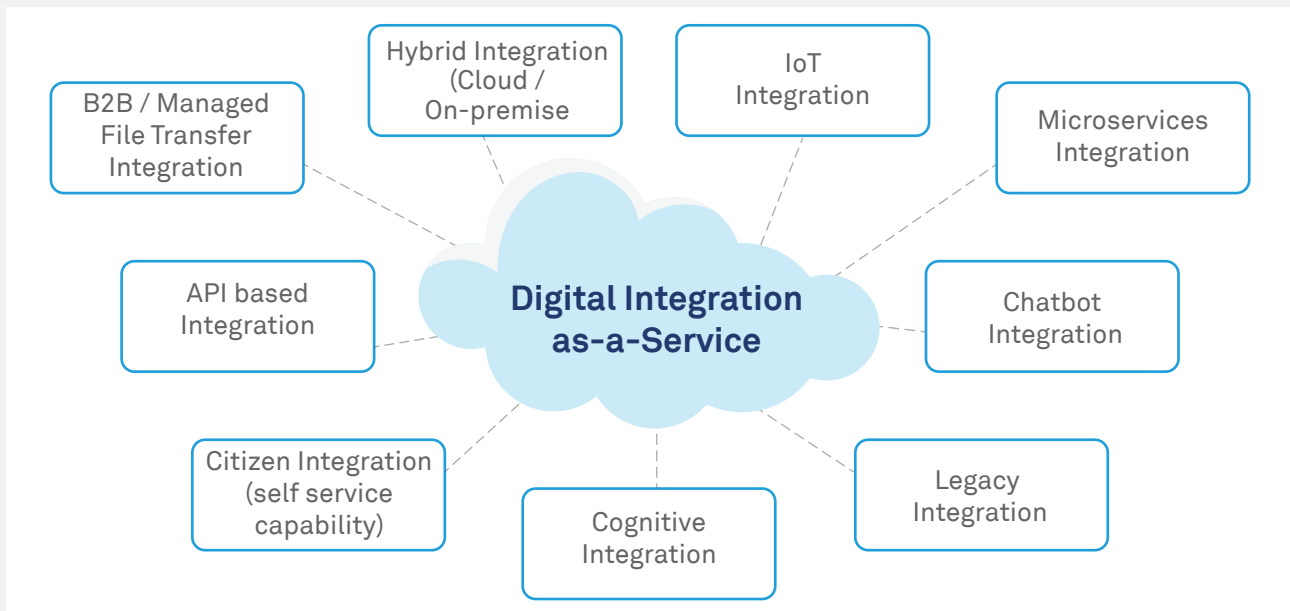

-  Cloud to Cloud and Cloud to on-premise integration with hybrid deployment infrastructure
-  Industry-specific API marketplace
-  IoT integration capability to integrate with devices and sensors
-  Trading partner onboarding and management along with managed file transfer capabilities
-  Capability to automatically fix common integration errors

A large, semi-transparent red circle graphic is positioned on the left side of the page, partially overlapping the main title and the bottom text.

30% reduction in
operational costs
through simplified
integration

Standards based, digital-ready integration platform with plug-and-play common integration components

Solution overview

Key features

- Can be leveraged together as a whole or in a standalone manner depending on the need of the business
- Pay-as-you-go pricing
- Ability to deliver faster integration using built-in marketplace containing ready-to-use APIs and integration components
- Chatbot and cognitive integration
- Integrated DevOps capability

Key benefits

- A one-stop shop for the integration of everything that helps clients monitor and manage operations, license and management costs
- Rapid time to market for new products and services. Lead time to production can be reduced from months to weeks
- Optimization of run and change costs through simplified integration - 30% reduction in operational costs
