Robotic Process Automation (RPA) Insight Dashboard

Wipro's Robotic Process Automation (RPA) Dashboard is a configurable reporting solution that provides real time business insights along with task execution status of the robotic processes. It is platform independent, mobile enabled, remotely accessible through smart devices and can be integrated with any existing RPA tool.

Enhanced advisor productivity: Web and mobile enabled information access and timely insights

Visual representation of RPA Insights

Platform agnostic

Pay per user/report

Fully customizable reporting application for robotic processes

Mobile enabled
real-time dashboard for
robotic KPIs and SLAs

Key features

End-to-end automation – Can support both end-to-end as well as partial/ assisted automation

Platform agnostic – Independent of the RPA tool used and fully reusable

Near real time availability of business insights

Access control and configurability – Customizable views depending on level of access and extensive configuration options available

Multi-tenant deployment – Facilitates single view of multiple deployments

Complete reporting – Designed to capture critical business metrics and not typical RPA task statistics

Key benefits

Ease of access

Complete view of BOT performance, usage statistics and exception management

Accuracy, volume and productivity at an individual level

Fully customizable reporting application
