# ServiceNow Security Incident Response

Leverage Agile practices, accelerators, and domain & technology expertise for stronger security incident response

Security teams today are inundated with alerts and information from a growing number of siloed point solutions. In parallel, attacks via both known and unknown threats continuously target critical business services, IT infrastructure and users. As a ServiceNow strategic partner, Wipro provides you with a step-by-step timeline for an industry-specific Security Orchestration, Automation and Response (SOAR) solution, based on the ServiceNow Security Incident Response.

**Leverage the power of ServiceNow software and Wipro's expertise to get stronger security incidents response and an effective Security Operations Center for your organization.**

## Key benefits

-  Test, execute and audit security response plans
-  Integrate event management with third party threat detection systems
-  Leverage NIST or SANS standards for security incidents
-  Handle network and non-network related incidents
-  Provide request automation between IT, end users and security teams
-  Reference step-by-step playbooks for quicker incident remediation
-  Identify and handle more critical threats first

# The combined power of Wipro and ServiceNow

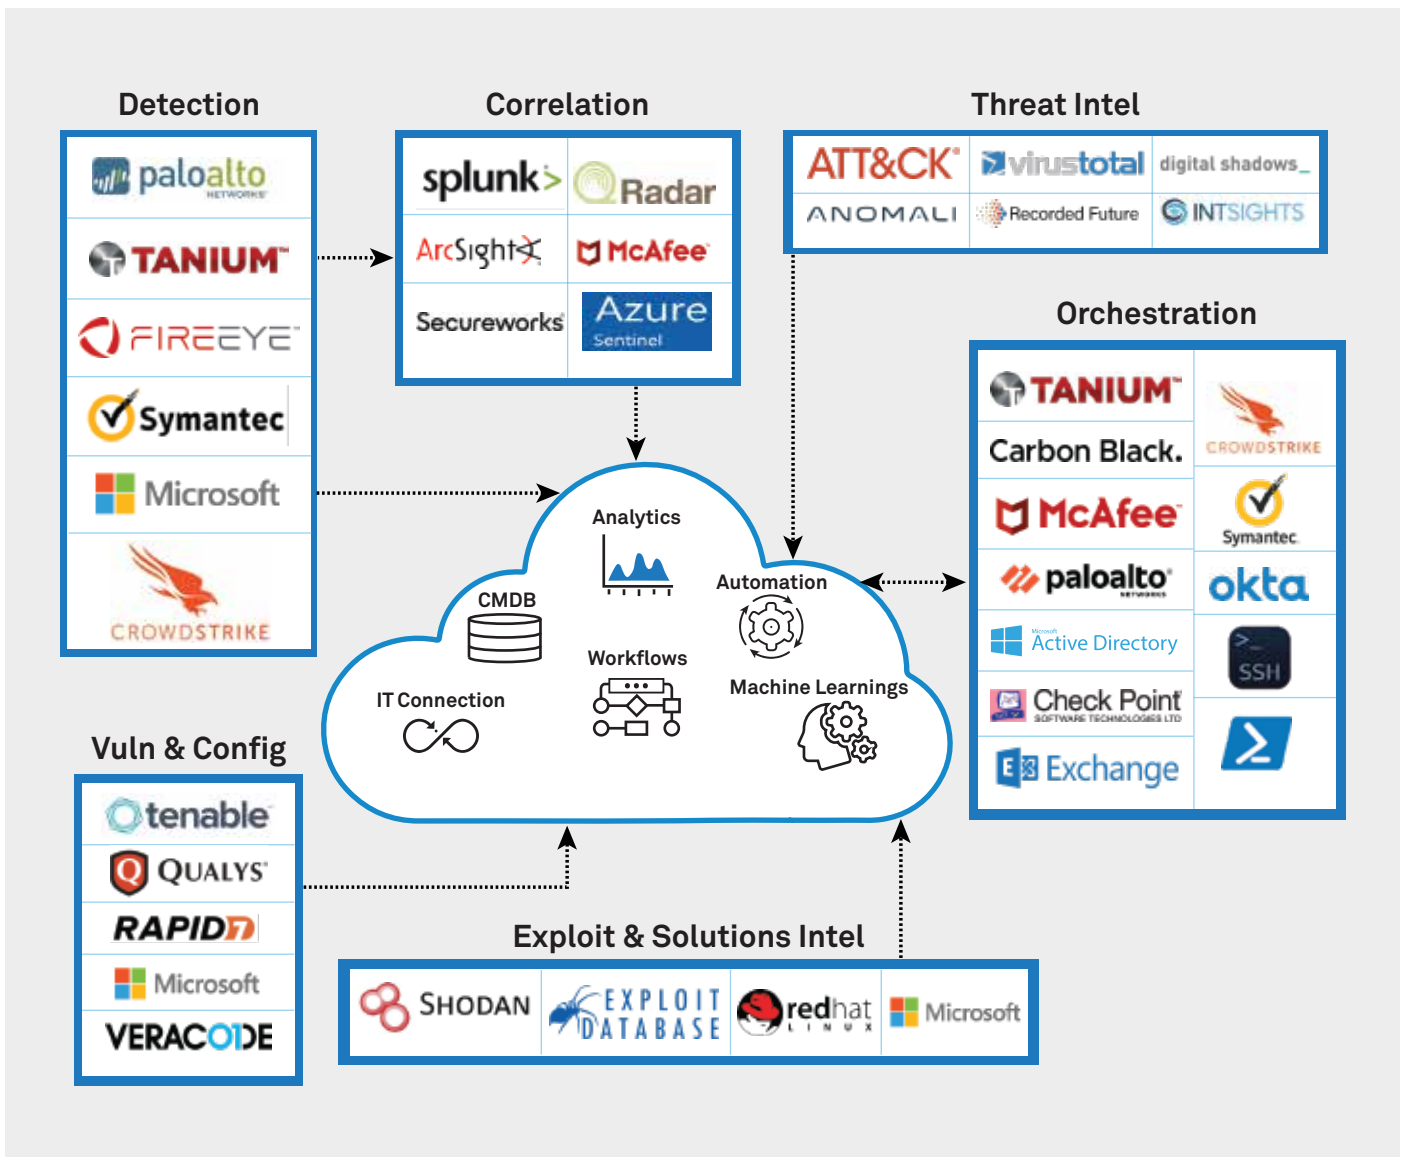

Without business context or the means to organize clear, coordinated workflows, analysts struggle to prioritize threats and organize relevant teams for a swift and comprehensive security response. Furthermore, manual processes and cross-team handoffs hinder the security team's ability to efficiently respond to attacks and formulate a more proactive remediation strategy.

**Security Incident Response** is part of ServiceNow Security Operations, a SOAR engine built on the Now platform. Designed to help security teams respond

faster and more efficiently to incidents and vulnerabilities, **Security Operations** uses intelligent workflows, automation, and a deep connection with IT to streamline the security response.

ServiceNow Security Incident Response includes a wide array of security incidents playbooks, integrations with SIEMs, EDRs, endpoint or network detection tools as well as threat intelligence solutions. We deploy SIR into your ServiceNow platform by leveraging ServiceNow's CMDB and its enterprise-wide workflow engine.

**Gain access to Wipro's best ServiceNow SIR experts in your team**
