# WIPRO HR SERVICES INDIA PRIVATE LIMITED NOTES TO THE STANDALONE FINANCIAL STATEMENTS (₹ in lacs, except share and per share data, unless otherwise stated)

### 1. The Company overview

Wipro HR Services India Private Limited (the 'Company') was incorporated on September 15, 2016. The Company was incorporated as Aon HR Services India Private Limited. The name was changed to Alight HR Services India Private Limited with effect from June 30, 2017. Subsequently, Wipro Limited acquired Alight HR Services India Private Limited on August 31, 2018 and the name was changed to Wipro HR Services India Private Limited with effect from October 11, 2018.

The Company is engaged in providing business process outsourcing and human resource outsourcing services majorly to its fellow subsidiaries and parent.

The financial statements were authorised for issue in accordance with a resolution of the directors on May 20, 2024.

### 2. Basis of preparation of financial statements

### 2.1. Statement of compliance and basis of preparation

These financial statements are prepared in accordance with Indian Accounting Standards ("Ind AS"), the provisions of the Companies Act, 2013 ("the Companies Act"), as applicable. The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

Accounting policies have been applied consistently to all periods presented in these financial statements, except for new accounting standards adopted by the Company.

The financial statements correspond to the classification provisions contained in Ind AS 1, "Presentation of Financial Statements". For clarity, various items are aggregated in the Statements of Profit and Loss and Balance Sheet. These items are disaggregated separately in the notes to the financial statements, where applicable.

All amounts included in the financial statements are reported in lakhs of Indian rupees (₹ in lakhs) except share and per share data, unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures. Previous year figures have been regrouped/re-arranged, wherever necessary.

### 2.2. Basis of measurement

These financial statements have been prepared on a historical cost convention and on an accrual basis, except for the following material items which have been measured at fair value as required by relevant Ind AS:

- a) Financial instruments classified as fair value through other comprehensive income or fair value through profit or loss; and
- b) The defined benefit asset/ (liability) is recognised as the present value of defined benefit obligation less fair value of plan assets.

#### 2.3. Use of estimates and judgment

The preparation of the financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses.

An accounting policy may require items in the financial statements to be measured at monetary amounts that cannot be observed directly and must instead be estimated. In such a case, management develops an accounting estimate to achieve the objective set out by the accounting policy. Developing accounting estimates involves the use of judgements or assumptions based on the latest available and reliable information

Actual results may differ from those estimates.

Accounting estimates and underlying assumptions are reviewed on an ongoing basis. Changes to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in the following notes:

- a) Defined benefit plans and compensated absences: The cost of the defined benefit plans, compensated absences and the present value of the defined benefit obligations are based on actuarial valuation using the projected unit credit method. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.
- b) Uncertainty relating to the global health pandemic on COVID-19: In assessing the recoverability of receivables including unbilled receivables, contract assets and contract costs, goodwill, intangible assets, and certain investments, the Company has considered internal and external information up to the date of approval of these standalone financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used herein. Based on the current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets.

The Company bases its assessment on the belief that the probability of occurrence of forecasted transactions is not impacted by COVID-19. The impact of COVID-19 may be different from what we have estimated as of the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

### 3. Material Accounting Policy Information

### 3.1. Functional and presentation currency

These financial statements are presented in Indian rupees, which is the functional currency of the Company.

### 3.2. Foreign currency transactions and translation

Transactions in foreign currency are translated into the functional currency using the exchange rates prevailing at the date of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at the exchange rates prevailing at the reporting date of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Profit and Loss and reported within foreign exchange gains/(losses). Non-monetary assets and liabilities denominated in foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Translation differences on non-monetary financial assets measured at fair value at the reporting date, such as equities classified as financial instruments measured at fair value through other comprehensive income are included in other comprehensive income, net of taxes.

### 3.3. Financial instruments

### a) Non-derivative financial instruments:

Non-derivative financial instruments consist of:

- Financial assets, which include cash and cash equivalents, trade receivables, unbilled receivables, finance lease
  receivables, employee and other advances and eligible current and non-current assets; Financial assets are derecognised
  when substantial risks and rewards of ownership of the financial asset have been transferred. In cases where substantial
  risks and rewards of ownership of the financial assets are neither transferred nor retained, financial assets are derecognised
  only when the Company has not retained control over the financial asset.
- Financial liabilities, which include, trade payables, lease liabilities and eligible current and non-current liabilities.
- Non- derivative financial instruments are recognised initially at fair value.

Subsequent to initial recognition, non-derivative financial instruments are measured as described below:

### A. Cash and cash equivalents

The Company's cash and cash equivalents consist of cash on hand and in banks and demand deposits with banks, which can be withdrawn at any time, without prior notice or penalty on the principal.

For the purposes of the Statement of Cash Flows, cash and cash equivalents include cash on hand, in banks and demand deposits with banks, net of outstanding bank overdrafts that are repayable on demand and are considered part of the Company's cash management system. In the Balance Sheet, bank overdrafts are presented under borrowings within current liabilities.

### **B.** Investments

Financial instruments measured at amortised cost:

Debt instruments that meet the following criteria are measured at amortised cost (except for debt instruments that are designated at fair value through Profit or Loss (FVTPL) on initial recognition):

the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and the
contractual terms of the instrument give rise on specified dates to cash flows that are solely payment of principal and
interest on the principal amount outstanding.

Financial instruments measured at fair value through profit or loss(FVTPL):

• Instruments that do not meet the amortised cost or FVTOCI criteria are measured at FVTPL. Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in statement of profit and loss. The gain or loss on disposal is recognised in statement of profit and loss.

### C. Other financial assets:

Other financial assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. These are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any impairment losses. These comprise trade receivables, unbilled revenues, employee and other advances and other eligible current and non-current assets.

### D. Trade and other payables

Trade and other payables are initially recognised at fair value, and subsequently carried at amortised cost using the effective interest method. For these financial instruments, the carrying amounts approximate fair value due to the short-term maturity of these instruments.

### b) Derecognition of financial instruments

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expires or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. If the Company retains substantially all the risks and rewards of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a borrowing for the proceeds received. A financial liability (or a part of a financial liability) is derecognised from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

#### 3.4. Equity

#### 3.4.1. Share capital

The authorised share capital of the Company as of March 31, 2024 is ₹ 70,100,000 divided into 7,010,000 equity shares of ₹ 10 each.

Every holder of the equity shares, as reflected in the records of the Company as of the date of the shareholder meeting shall have one vote in respect of each share held for all matters submitted to vote in the shareholder meeting.

### 3.4.2. Retained earnings

Retained earnings comprises of the Company's undistributed earnings after taxes.

### 3.4.3. Capital reserve

The Company was formed as a part of scheme of demerger out of Aon Consulting Private Limited. Difference between book values of assets and liabilities as per the scheme is recorded as Capital reserve. Capital reserve amounting to ₹ 23,609 (March 31, 2023: ₹ 23,609) is not freely available for distribution.

### 3.4.4. Other comprehensive income

Changes in the fair value of financial instruments measured at fair value through other comprehensive income and actuarial gains and losses on remeasurements of the defined benefit plans are recognised in other comprehensive income (net of taxes), and presented within equity as other reserves.

### 3.5. Property, plant and equipment

#### 3.5.1. Recognition and measurement

Property, plant and equipment are measured at cost less accumulated depreciation and impairment losses, if any. Cost includes expenditures directly attributable to the acquisition of the asset. General and specific borrowing costs directly attributable to the construction of a qualifying asset are capitalised as part of the cost. Capital work-in-progress are measured at cost less accumulated impairment losses, if any.

### 3.5.2. Depreciation

The Company depreciates property, plant and equipment over the estimated useful life on a straight-line basis from the date the assets are available for use. Leasehold improvements are amortised over the shorter of estimated useful life of the asset or the related lease term. Term licenses are amortised over their respective contract term. The estimated useful life of assets is reviewed is where appropriate are adjusted, annually. The estimated useful lives of assets are as follows:

| Category                          | Useful life |
|-----------------------------------|-------------|
| Plant and machinery               | 5 - 7 years |
| Software                          | 4 years     |
| Computer equipment                | 3 years     |
| Furniture, fixtures and equipment | 5 years     |

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to property, plant and equipment is capitalised only when it is probable that future economic benefits associated with these will flow to the Company and the cost of the item can be measured reliably.

The cost of property, plant and equipment not available for use before such date are disclosed under capital work- inprogress.

#### 3.6. Leases

### The Company as a lessee

The Company enters into an arrangement for lease of land, buildings, plant and equipment including computer equipment and vehicles. Such arrangements are generally for a fixed period but may have extension or termination options. The Company assesses whether the contract is, or contains a lease, at its inception. A contract is, or contains, a lease if the contract conveys the right to:

- a. control use of an identified asset,
- b. obtain substantially all the economic benefits from use of the identified asset, and
- c. direct the use of the identified asset

The Company determines the lease term as the non-cancellable period of lease, together with periods covered by an option to extend the lease, where the company is reasonably certain to exercise that option.

The Company at the commencement of the lease contract recognises a Right-of-Use (RoU) asset at cost and corresponding lease liability, except for leases with term of less than twelve months (short term) leases and low-value assets. For these short term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the lease term.

The cost of the right-of-use asset comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the inception date of the lease, plus any initial direct costs, less any lease incentives received. Subsequently, the right-of-use assets are measured at cost less any accumulated depreciation and accumulated impairment losses, if any. The right-of-use assets are depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment.

The Company applies Ind AS 36 to determine whether an RoU asset is impaired and accounts for any identified impairment loss as described in the impairment of non-financial assets below.

For lease liabilities at the commencement of the lease, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate is readily determined, if that rate is not readily determined, the lease payments are discounted using the

incremental borrowing rate that the Company would have to pay to borrow funds, including the consideration of factors such as the nature of the asset and location, collateral, market terms and conditions, as applicable in a similar economic environment.

After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made.

The Company recognizes the amount of the re-measurement of lease liability as an adjustment to the right-of-use asset. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognizes any remaining amount of the re-measurement in Statement of Profit and Loss.

Lease payments are classified as Cash used in financing activities in the statement of cash flows.

### The Company as a lessor

Leases under which the Company is a lessor are classified as a finance or operating lease. Lease contracts where all the risks and rewards are substantially transferred to the lessee are classified as a finance lease. All other leases are classified as operating leases.

For leases under which the Company is an intermediate lessor, the Company accounts for the head-lease and the sub-lease as two separate contracts. The sub-lease is further classified either as a finance lease or an operating lease by reference to the RoU asset arising from the head-lease.

### (ix) Impairment

#### A) Financial assets

The Company applies the expected credit loss model for recognizing impairment loss on financial assets measured at amortised cost, trade receivables and other financial assets. Expected credit loss is the difference between the contractual cash flows and the cash flows that the entity expects to receive discounted using effective interest rate.

Loss allowances for trade receivables and other financial assets are measured at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument. Lifetime expected credit loss is computed based on a provision matrix which takes in to the account risk profiling of customers and historical credit loss experience adjusted for forward looking information. For other financial assets, expected credit loss is measured at the amount equal to twelve months expected credit loss unless there has been a significant increase in credit risk from initial recognition, in which case those are measured at lifetime expected credit loss.

#### B) Non - financial assets

The Company assesses long-lived assets such as property, plant and equipment and right-of-use assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be recoverable. If any such indication exists, the Company estimates the recoverable amount of the asset or group of assets. The recoverable amount of an asset or cash generating unit is the higher of its fair value less cost of disposal (FVLCD) and its value-in-use (VIU). The VIU of long-lived assets is calculated using projected future cash flows. FVLCD of a cash generating unit is computed using turnover and earnings multiples. If the recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognised in the Statement of Profit and Loss. If at the reporting date, there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the impairment losses previously recognised are reversed such that the asset is recognised at its recoverable amount but not exceeding written down value which would have been reported if the impairment losses had not been recognised initially.

### (x) Employee benefits

#### a) Post-employment and pension plans

The Company participates in various employee benefit plans. Pensions and other post-employment benefits are classified as either defined contribution plans or defined benefit plans. Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial and investment risks are borne by the employee. The expenditure for defined contribution plans is recognised as an expense during the period when the employee

provides service. Under a defined benefit plan, it is the Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks are borne by the Company. The present value of the defined benefit obligations is calculated by an independent actuary using the projected unit credit method.

Remeasurements of the defined benefit plans, comprising actuarial gains or losses and the return on plan assets (excluding interest) are immediately recognised in other comprehensive income, net of taxes and not reclassified to profit or loss in subsequent period. The discount rate used to measure the defined benefit obligation to the net defined benefit liability or asset. The actual return on the plan assets above or below the discount rate is recognised as part of remeasurement of the defined liability plans through other comprehensive income, net of taxes.

The Company has the following employee benefit plans:

#### A. Provident fund

Employees receive benefits from a provident fund, which is a defined benefit plan. The employer and employees each make periodic contributions to the plan. A portion of the contribution is made to the approved provident fund trust managed by the Company while the remainder of the contribution is made to the government administered pension fund. The contributions to the trust managed by the Company is accounted for as a defined benefit plan as the Company is liable for any shortfall in the fund assets based on the government specified minimum rates of return.

### B. Superannuation

Superannuation plan, a defined contribution scheme is administered by third party fund managers. The Company makes annual contributions based on a specified percentage of each eligible employee's salary.

### C. Gratuity

In accordance with the Payment of Gratuity Act, 1972, applicable for Indian companies, the Company provides for a lump sum payment to eligible employees, at retirement or termination of employment based on the last drawn salary and years of employment with the Company. The Company's obligation in respect of the gratuity plan, which is a defined benefit plan, is provided for based on actuarial valuation using the projected unit credit method. The Company recognises actuarial gains and losses in other comprehensive income, net of taxes.

### b) Termination benefits

Termination benefits are expensed when the Company can no longer withdraw the offer of those benefits.

### c) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are recorded as expense as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

### d) Compensated absences

The employees of the Company are entitled to compensate absences. The employees can carry forward a portion of the unutilised accumulating compensated absences and utilise it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for compensated absences in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of compensated absences as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The Company recognises accumulated compensated absences based on actuarial valuation using the projected unit credit method. Non-accumulating compensated absences are recognised in the period in which the absences occur.

### (xii) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset, if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions for onerous contracts are recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable costs of meeting the future obligations under the contract. Provisions for onerous contracts are measured at the present value of lower of the expected net cost of fulfilling the contract and the expected cost of terminating the contract.

### (xiii) Revenue

The Company derives revenue primarily from business process outsourcing, technology development services, human resource outsourcing services. The Company recognises revenue when the significant terms of the arrangement are enforceable, services have been delivered and the collectability is reasonably assured.

Revenue is determined on the basis of an agreed mark-up on the costs incurred, in accordance with the arrangements entered into with the parent company/its affiliates and recognised on monthly basis.

'Unbilled revenues' represent cost and earnings in excess of billings as at the end of the reporting period. 'Unearned revenues' represent billing in excess of revenue recognised. Advance payments received from customers for which no services have been rendered are presented as 'Advance from customers'.

### (xv) Other income

Other income comprises interest income on deposits, dividend income and gains / (losses), net, on disposal of investments. Interest income is recognised using the effective interest method. Dividend income is recognised when the right to receive payment is established.

#### (xvi) Finance Cost

Finance cost comprise interest cost on lease liabilities and net defined benefit liability.

### (xvii) Income tax

Income tax comprises current and deferred tax. Income tax expense is recognised in the Statement of Profit and Loss except to the extent it relates to a business combination, or items directly recognised in equity or in other comprehensive income.

#### a) Current income tax

Current income tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted as at the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognised amounts and where it intends either to settle on a net basis, or to realise the asset and liability simultaneously.

### b) Deferred income tax

Deferred income tax is recognised using the Balance Sheet approach. Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred income tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilised.

Deferred income tax liabilities are recognised for all taxable temporary differences except in respect of taxable temporary differences that is expected to reverse within the tax holiday period, taxable temporary differences associated with investments in subsidiaries, associates and foreign branches where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Company offsets deferred income tax assets and liabilities, where it has a legally enforceable right to offset current tax assets against current tax liabilities, and they relate to taxes levied by the same taxation authority on either the same taxable entity, or on different taxable entities where there is an intention to settle the current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

### (xviii) Earnings per share

Basic earnings per share is computed using the weighted average number of equity shares outstanding during the period adjusted for treasury shares held. Diluted earnings per share is computed using the weighted-average number of equity and dilutive equivalent shares outstanding during the period, using the treasury stock method for options, except where the results would be anti - dilutive.

The number of equity shares are potentially dilutive equity shares are adjusted retrospectively for all periods presented for any splits and bonus shares issues including for change effected prior to the approval of the financial statement by the Board of Directors.

### (xix) Statement of Cash Flows

Statement of Cash Flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash from operating, investing and financing activities of the Company are segregated.

New Accounting standards, amendments and interpretations adopted by the Company effective from April 1, 2022:

### i. Amendments to Ind AS 37 - Onerous Contracts - Cost of Fulfilling a Contract

The amendments specify that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be the incremental costs of fulfilling that contract (for example, direct labour and materials); or an allocation of other costs that relate directly to fulfilling contracts (for example, an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling that contract among others). The adoption of this amendment did not have any material impact on the financial statements.

### ii. Amendments to Ind AS 103 - Business Combinations - Reference to Conceptual Framework

The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The adoption of amendments to Ind AS 103 did not have any material impact on the financial statements.

#### iii. Amendments to Ind AS 109 - Financial Instruments

The amendments clarify which fees an entity includes when it applies the '10 percent' test of Ind AS 109 in assessing whether to derecognise a financial liability. The adoption of amendments to Ind AS 109 did not have any material impact on the financial statements.

### iv. Amendments to Ind AS 16 - Property, Plant and Equipment - Proceeds before intended use

The amendments clarify that excess of net sale proceeds of items produced over the cost of testing, if any, shall not be recognised in the profit or loss but deducted from the directly attributable costs considered as part of cost of an item of property, plant, and equipment. The adoption of amendments to Ind AS 16 did not have any material impact on the financial statements.

# New Accounting standards, amendments and interpretations adopted by the Company effective from April 1, 2023: Amendments to Ind AS 12 – Income Taxes

On March 31, 2023, the Ministry of Corporate Affairs notified the Companies (Indian Accounting Standards) Amendment Rules, 2023 effective from April 1, 2023. The amendments to Ind AS 12 clarify how companies account for deferred tax on transactions such as leases and decommissioning obligations. In specified circumstances, companies are exempt from recognising deferred tax when they recognise assets or liabilities for the first time. The amendments clarify that this exemption does not apply to transactions such as leases and decommissioning obligations and companies are required to recognise deferred tax on such transactions. The adoption of these amendments to Ind AS 12 did not have any material impact on the standalone financial statements.

Financial assets and liabilities include each cash and cash equivalents, trade receivables, employee and other advances, eligible current and non-current assets, lease liabilities, trade payables, and eligible current liabilities and non-current liabilities.

#### Fair Value

The fair value of cash and cash equivalents, trade receivables, trade payables, other current financial assets and liabilities approximate their carrying amount largely due to the short-term nature of these instruments.

#### Financial risk management

#### Market Risk

Market risk is the risk of loss of future earnings, to fair values or to future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments, foreign currency receivables, payables and loans and borrowings.

The Company's exposure to market risk is a function of investment activities and revenue generating activities in foreign currency. The objective of market risk management is to avoid excessive exposure of the Company's earnings and equity to losses.

### **Risk Management Procedures**

The Company manages market risk through Company's treasury department, which evaluates and exercises independent control over the entire process of market risk management. The department recommends risk management objectives and policies, which are approved by senior management. The activities of this department include management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, and ensuring compliance with market risk limits and policies.

### Foreign currency risk

The Company operates internationally and a major portion of its business is transacted in US Dollar (USD). Consequently, the Company is exposed to foreign exchange risk through receiving payment for sale of services in the United States, and making purchases from overseas suppliers in foreign currencies. The exchange rate risk primarily arises from foreign exchange revenue, receivables, cash balances, forecasted cash flows and payables. A significant portion of the Company's revenue is in the U.S. Dollar, while a large portion of costs are in Indian rupees. The exchange rate between the Indian rupee and these currencies has fluctuated significantly in recent years and may continue to fluctuate in the future. Appreciation of the rupee against these currencies can adversely affect the Company's results of operations. The Company follows established risk management policies under the Company's treasury department directives. The below table presents foreign currency risk from non-derivative financial instruments

As at March 31, 2024

| Particulars                        | US \$  | Others | Total          |  |
|------------------------------------|--------|--------|----------------|--|

#### ^ Less than 1 lac

As at March 31, 2024 and 2023, respectively, every 1% increase/decrease of the respective foreign currencies compared to functional currency of the Company would impact results by approximately  $\stackrel{?}{\underset{?}{|}}$  101 and  $\stackrel{?}{\underset{?}{|}}$  342, respectively.

### Counterparty risk

Counterparty risk encompasses issuer risk on marketable securities and credit risk on receivables and cash and time deposits. Issuer risk is minimized by only buying securities which are at least AA rated in India based on Indian rating agencies. Credit risk is reduced by the policy of entering into transactions with counterparties that are usually banks or financial institutions with acceptable credit ratings. The concentration of credit risk on trade receivables is limited as trade receivables include only the related parties of the Company.

### Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's corporate treasury department is responsible for liquidity and funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through rolling forecasts on the basis of expected cash flows. Cash and cash equivalents are held with major banks and financial institutions.

The table below provides details regarding the remaining contractual maturities of significant financial liabilities at the reporting date. The amounts include estimated interest payments and exclude the impact of netting agreements, if any.

Income tax expenses are net of reversal/ (creation) of provisions pertaining to earlier periods, amounting to ₹ 314 and ₹ 334 for the year ended March 31, 2024 and 2023, respectively.

In assessing the realisability of deferred tax assets, the Company considers the extent to which it is probable that the deferred tax asset will be realised. The ultimate realisation of deferred tax assets is dependent upon the generation of future taxable profits during the periods in which those temporary differences and tax loss carry-forwards become deductible. The Company considers the expected reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on this, the Company believes that it is probable that the Company will realise the benefits of these deductible differences. The amount of deferred tax asset considered realisable, however, could be reduced in the near term if the estimates of future taxable income during the carry-forward period are reduced

The reconciliation between the provision of income tax and amounts computed by applying the Indian statutory income tax rate to profit before taxes is as follows:

|   | Year ended March 31, |              |  |
|---|----------------------|--------------|--|

<sup>\*</sup> The Gratuity and other defined benefit plans include the current service cost of gratuity and pension amounting to ₹ 1,175 and ₹ 1,254 for the year ended March 31, 2024 and March 31, 2023 respectively.

### **Employee stock option**

The stock compensation expense recognised for employee services received during the year ended year ended March 31, 2024 and March 31, 2023 were ₹ 538 and ₹ 315, respectively.

### Wipro Equity Reward Trust ("WERT")

In 1984, the Holding Company "Wipro Limited" of Wipro HR Services India Private Limited established a controlled trust called the Wipro Equity Reward Trust ("WERT"). In the earlier years, WERT purchased shares of the Company out of funds borrowed from the Company. The Company's Board Governance, Nomination and Compensation Committee recommends to WERT certain officers and key employees, to whom WERT issues shares from its holdings at nominal price subject to vesting conditions.

### Wipro Employee Stock Option Plans and Restricted Stock Unit Option Plans

A summary of the general terms of grants under stock option plans and restricted stock unit option plans are as follows:

| Name of Plan   | Number of options<br>reserved under the<br>plan | Range of exercise price |
|--|---|-------------------------|
| Wipro employee Restricted Stock Unit Plan 2007 (WSRUP 2007 plan) * | 92,974  | ₹ 2                     |
| Wipro Equity Reward Trust Employee Stock Purchase Plan, 2013 **    | 87,614  | ₹2                      |

Employees covered under Stock Option Plans and Restricted Stock Unit ("RSU") Option Plans (collectively "Stock Option Plans") are granted an option to purchase shares of the Company at the respective exercise prices, subject to requirements of vesting conditions. These options generally vest in tranches over a period of one to four years from the date of grant. Upon vesting, the employees can acquire one equity share for every option.

\* The maximum contractual term for these Stock Option Plans and RSU Option Plans is perpetual until the options are available for grant under the plan.

\*\* The maximum contractual term for these Stock Option Plans is up to May 29, 2023 until the options are available for grant under the plan.

The activity in equity-settled stock option plans and restricted stock unit option plan is summarised below:

|  | Range of exercise |                    | Year en           | ded            |  |
|--|-------------------|--------------------|-------------------|----------------|--|

### Defined benefit plan actuarial (gains)/ losses recognised in other comprehensive income include:

|   | Year ended March 31,                    |         |  |
|---|---|---------|--|
|   | 2024                                    | 2023    |  |
| Re-measurement of net defined benefit liability/(asset)     | *************************************** |         |  |
| Actuarial (gains)/loss arising from financial assumptions   | ₹ 17                                    | ₹ (784) |  |
| Actuarial (gains)/loss arising from demographic assumptions | 173                                     | (291)   |  |
| Actuarial (gains)/loss arising from experience adjustments  | (47)                                    | 364     |  |
|   | ₹ 143                                   | ₹ (711) |  |

### b) Defined benefit-plans-Gratuity:

### Amount recognized in the statement of income in respect of defined benefit plans is as follows:

| Year ended March 31, |      |                     |
|----------------------|------|---------------------|
| 2                    | 2024 | 2023                |
| ₹ 1                  | ,175 | ₹ 1,254             |
|                      | 663  | 574                 |
| ₹ 1,                 | ,838 | ₹ 1,828             |
|                      | ₹ 1  | <b>2024</b> ₹ 1,175 |

Gratuity is applicable only to employees drawing a salary in Indian rupees and there are no other foreign defined benefit gratuity plans.

Change in present value of defined benefit obligation is summarised below:

|   | Year ended March 31, |         |  |
|---|----------------------|---------|--|
|   | 2024                 | 2023    |  |
| Defined benefit obligation at the beginning of the year     | ₹ 9,106              | ₹ 9.320 |  |
| Current service cost  | 1,175                | 1,254   |  |
| Interest on obligation                                      | 663                  | 574     |  |
| (Benefits paid  | (614)                | (1,331) |  |
| Remeasurement (gains)/loss                                  | (0.1.)               | (1,551) |  |
| Actuarial (gains)/loss arising from financial assumptions   | 16                   | (784)   |  |
| Actuarial (gains)/loss arising from demographic assumptions | 173                  | (291)   |  |
| Actuarial (gains)/loss arising from experience adjustments  | (47)                 | 364)    |  |
| Defined benefit obligation at the end of the year           | ₹ 10,472             | ₹ 9,106 |  |

The principal assumptions used for the purpose of actuarial valuation of these defined benefit plans are as follows:

|                                  | Year ended Ma | ren 31, |
|----------------------------------|---------------|---------|
|                                  | 2024          | 2023    |
| Discount rate                    | 7.15%         | 7.25%   |
| Expected rate of salary increase | 8%            | 8%      |

The discount rate is primarily based on the prevailing market yields of government securities for the estimated term of the obligations. The estimates of future salary increases considered takes into account the inflation, seniority, promotion and other relevant factors. Attrition rate considered is the management's estimate, based on previous years' employee turnover of the Company.

Sensitivity for significant actuarial assumptions is computed to show the movement in defined benefit obligation by 1 basis points.

As at March 31, 2024, every 1 basis point increase/ (decrease) in discount rate will result in increase/(decrease) of gratuity benefit obligation by approximately ₹ (82) and ₹ 90 respectively.

As at March 31, 2024 every 1 basis point increase/ (decrease) in expected rate of salary will result in increase/ (decrease) of gratuity benefit obligation by approximately ₹ (122) and ₹ 135 respectively.

### 22. Other Expenses

|  | Year ended March 31, |          |                 |
|--|----------------------|----------|-----------------|
|  | 2024                 |          | 023             |

| Travel Total   | 4.0<br>₹ 11,4        |          | 2,884<br>11,029 |

### 23. Earnings per equity share

A reconciliation of profit for the year and equity shares used in the computation of basic and diluted earnings per equity share is set out below:

Basic and diluted: Basic earnings per share is calculated by dividing the profit attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed using the weighted-average number of equity and dilutive equivalent shares outstanding during the period. There were no dilutive equivalent shares outstanding during the period.

|   | Year ended March 31,  |                       |  |
|---|-----------------------|-----------------------|--|
|   | 2024                  | 2023                  |  |
| Profit attributable to equity holders of the Company Weighted average number of equity shares outstanding | ₹ 12,860<br>7,010,000 | ₹ 11,686<br>7,010,000 |  |
| Basic and diluted earnings per share  | ₹ 183.85              | ₹ 166.71              |  |

### 24. Dividend paid

The Company declares and pays dividends in Indian rupees. According to the Companies Act, 2013 any dividend should be declared out of accumulated distributable profits. A Company may, before the declaration of any dividend, transfer a percentage of its profits for that financial year as it may consider appropriate to the reserves.

The cash dividends paid per equity share were ₹ NIL and ₹65.91, during the year ended March 31, 2024 and 2023, respectively

### 25. Additional capital disclosures

The key objective of the Company's capital management is to ensure that it maintains a stable capital structure with the focus on total equity to uphold investor, creditor, and customer confidence and to ensure future development of its business. The Company focused on keeping strong total equity base to ensure independence, security, as well as a high financial flexibility for potential future borrowings, if required without impacting the risk profile of the Company.

The capital structure as of March 31, 2024 and 2023 was as follows:

|   | A         | s at March 31, |         |
|---|-----------|----------------|---------|
| Total aguity (A)  | 2024      | 2023           | %Change |
| Total equity (A)  | ₹ 90,291  | ₹ 77,528       | 16.45%  |
| As percentage of total capital                                    | 89.49%    | 94.05%         |         |
| Net lease liabilities- Non-current Net lease liabilities- Current | 8,577     | 2,198          |         |
|   | 2,024     | 2,704          |         |
| Total Lease Liabilities(B)  | ₹ 10,601  | ₹ 4,902        |         |
| As percentage of total capital                                    | 11.74%    | 5.95%          |         |
| Total capital (A) + (B)   | ₹ 100,892 | ₹ 82,430       | 22.38%  |

### 26. Related party relationship and transactions

### Holding Company and Ultimate Holding Company

Wipro Limited Wipro LLC

### Key Management personnel

Krishnan Subramanian – Director Navin Gadia – Director (w.e.f. April 8, 2024) Ashish Chawla – Director Aparna Iyer (till October 11, 2023)

The company has the following related party transactions for the year ended March 31, 2024 and 2023:

|   | Holding Company |                            |      |                       | Fellow subsidiaries |                  |  |
